

Climate Change Emergencies & Cultural Heritage Speaker Series

**Enhancing Communities  
Adaptive & Transformative Capacity  
Through Collaborative Finance**

8 April 2024

**Cecilie Smith-Christensen**

World Heritage Catalysis

<https://www.whcatalysis.org>

# Presenter

**Cecilie Smith-Christensen**

Economist Cand. Oecon,  
University of Oslo, Norway

World Heritage Catalysis  
Founder & lead catalyst

ICOMOS ICTC (Bureau member)  
ICOMOS Norway (Board member)

Expert Advisor to the UNESCO World Heritage Sustainable  
Tourism Programme: Lead developer of UNESCO Visitor  
Management Assessment & Strategy Tool (VMAST)

# Presentation focus

- ★ The unsustainability of the Agenda 2030 (SDG 8) and why economics should be at the center of climate action & strategic management.
- ★ The host community as a system, network of networks and why resilience is the “new sustainability”
- ★ The transformation challenge and how World Heritage Catalysis seeks to connect practices and support the transformation journey
  - > transformative visitor management and collaborative finance

# Agenda 2030 as a development paradigm

Carbon Footprint of Global Tourism

Tourism accounting for approximately 8-11% of man made emissions.

<https://sdgs.un.org/goals>

<https://www.unwto.org/tourism-statistics/economic-contribution-SDG>

<https://sustainabletravel.org/issues/carbon-footprint-tourism/>

# A growth dependent development paradigm

## Target 8.1

*Sustain per capita economic growth in accordance with national circumstances and, in particular, at least 7 per cent gross domestic product growth per annum in the least developed countries*

### Indicator 8.1.1

*Annual growth rate of real GDP per capita*

## Target 8.9

*By 2030, devise and implement policies to promote sustainable tourism that creates jobs and promotes local culture and products*

### Indicator 8.9.1

*Tourism direct GDP as a proportion of total GDP and in growth rate*

Make cities and human settlements inclusive, safe, resilient and sustainable

## Target 11.4

Strengthen efforts to protect and safeguard the world's cultural and natural heritage

## Target 11.4

*Strengthen efforts to protect and safeguard the world's cultural and natural heritage*

### Indicator 11.4.1

*Total per capita expenditure on the preservation, protection and conservation of all cultural and natural heritage, by source of funding (public, private), type of heritage (cultural, natural) and level of government (national, regional, and local/municipal).*

# A fundamentally unsustainable path

!! Growth is exponential, not linear.

- SDG Target 8.1 and a 7% gross domestic growth will mean need for doubling in 10 years.

!! Money is issued into circulation as interest bearing debt.

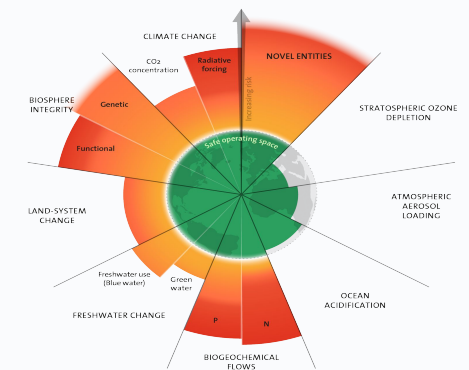

- Servicing global debt will require continuous extraction of natural, cultural and human resources.

Global debt \$305 trillion

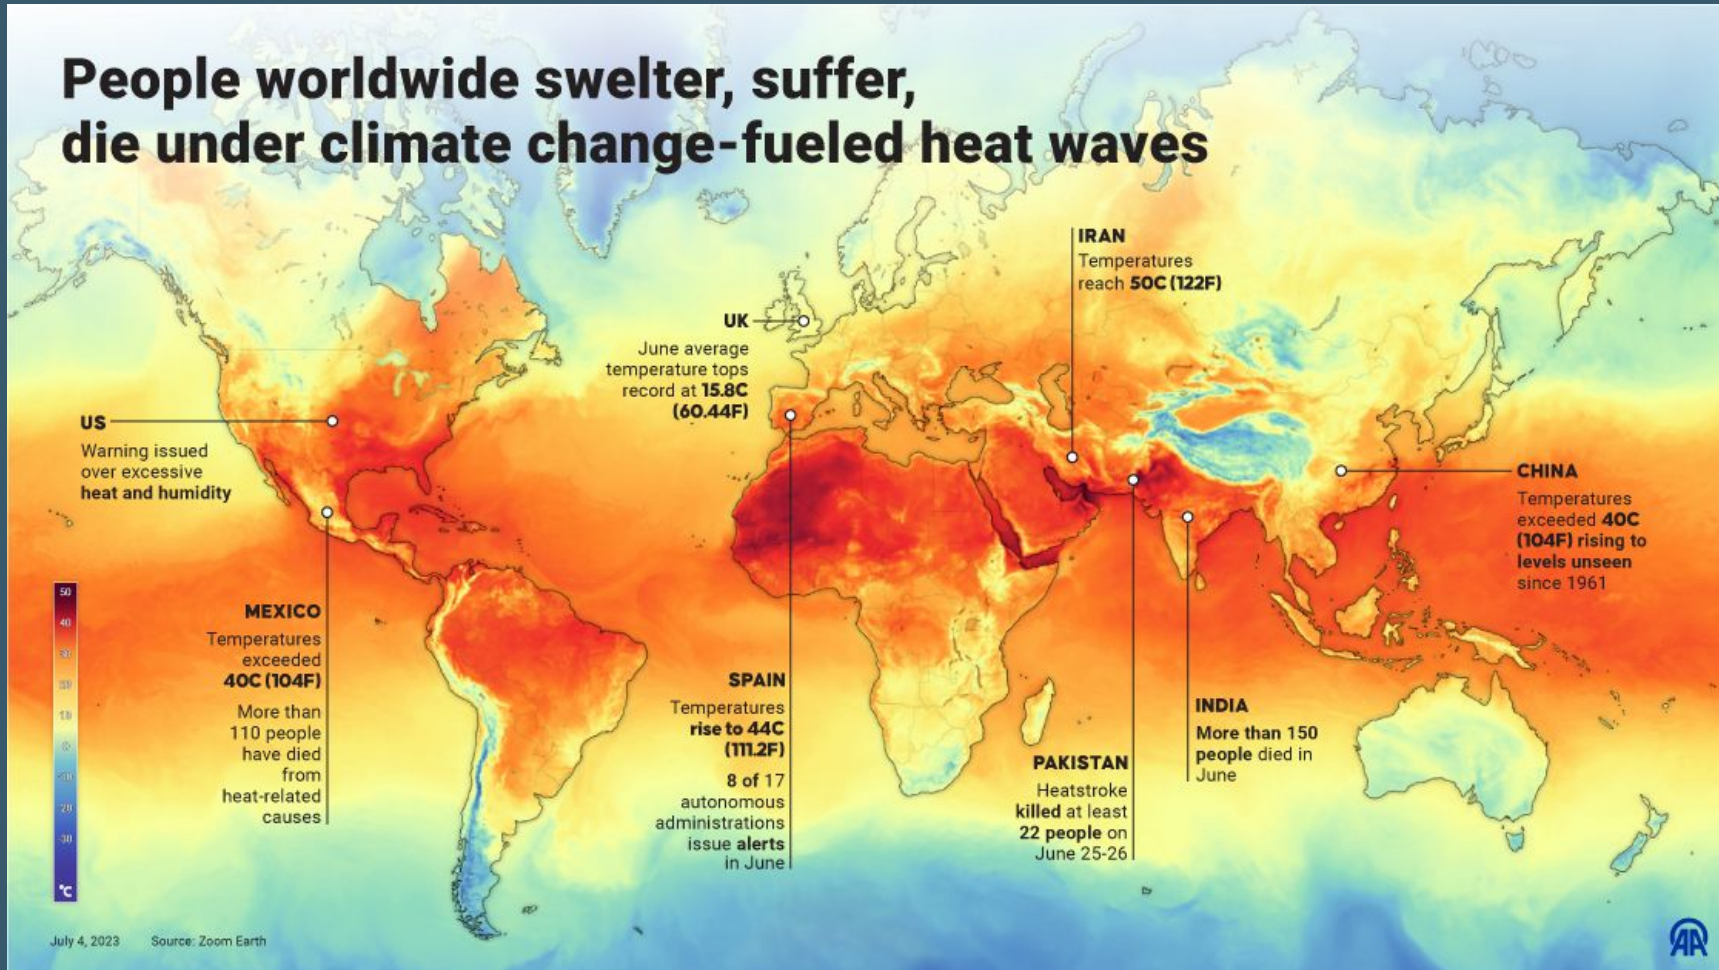

6 of 9 planetary boundaries crossed

# The anthropocene

## People worldwide swelter, suffer, die under climate change-fueled heat waves

# An agenda off track

In 2023 of the roughly 140 targets:

12% are on track

> 50% are moderately or severely off track

> 30% have either seen no movement or regressed below the 2015 baseline.

# Interconnected risks in a VUCA world

# White, grey & black swan events

Probable, predictable,  
foreseeable consequences.  
Effects can be estimated.

Seasonal fluctuations, more  
extreme weather, etc.

Possible and predictable.  
Significant but uncertain impact.  
Neglected preparation.

Climate change, population  
development, climate refugees,  
pandemics, etc.

Unpredictable, extreme  
impact. Impossible to fully  
prepare for.

Financial collapse 2008, 9/11,  
Covid 19.

“In the coming years, the success of travel and tourism businesses and destinations will be increasingly tied to their ability to manage and operate under even greater ecological threats”

– World Economic Forum 2023

# Sustainability & resilience is relational

Host community / Tourism destination  
Rights- and stakeholders

Distributed structure

Community = interconnections / network of networks

Defragmented

A well-functioning tourism economy

Fragmented

A disruption can cause fragmentation and exodus of people and businesses.

# Resilience - the “new sustainability”

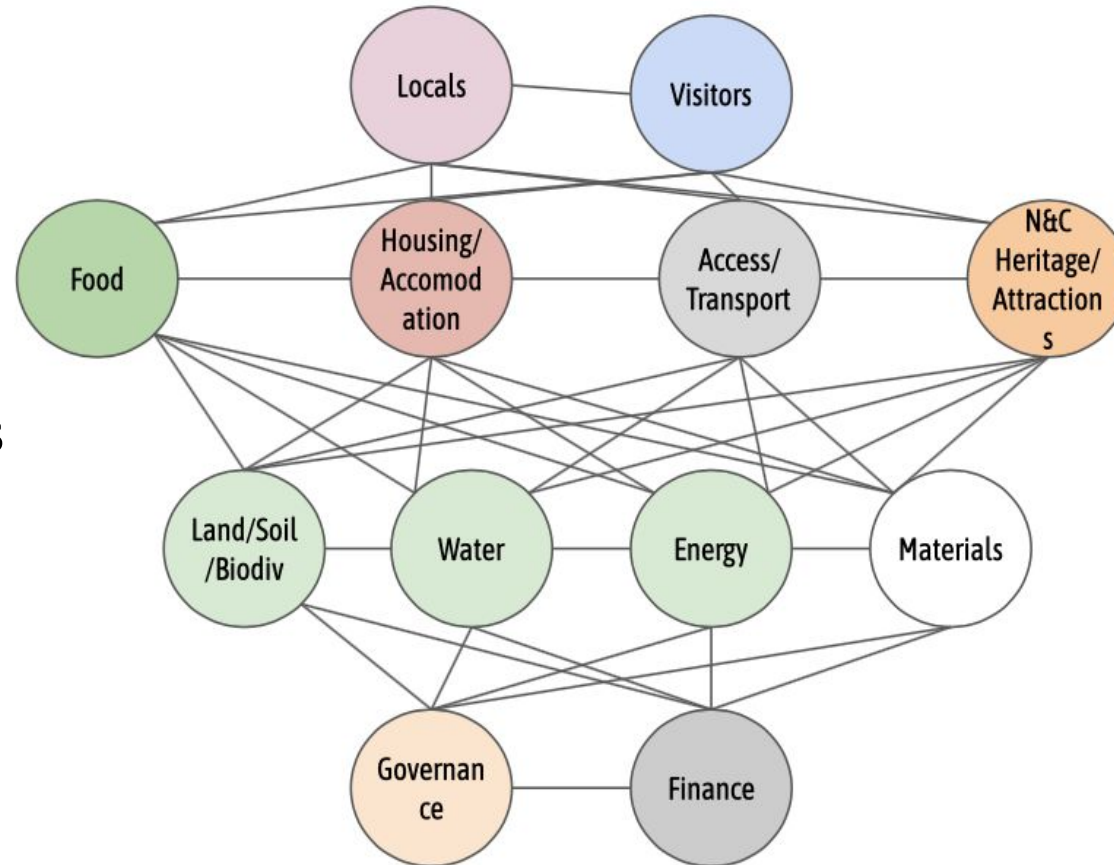

Residents cool off at a pool in Jinan in eastern China's Shandong province.  
Photograph: Ng Han Guan/AP

Local communities will increasingly need to adapt and self-organize in the face of challenges and disruptions, such as disasters or crises.

# Host community & systems interdependence

**Relationship  
between systems  
within a (host)  
community**

Stake/interest  
holders/consumers/producers

Interface between tourism &  
community

Underlying conditions for  
sustainability

New value networks  
Decoupling the economy from  
extraction

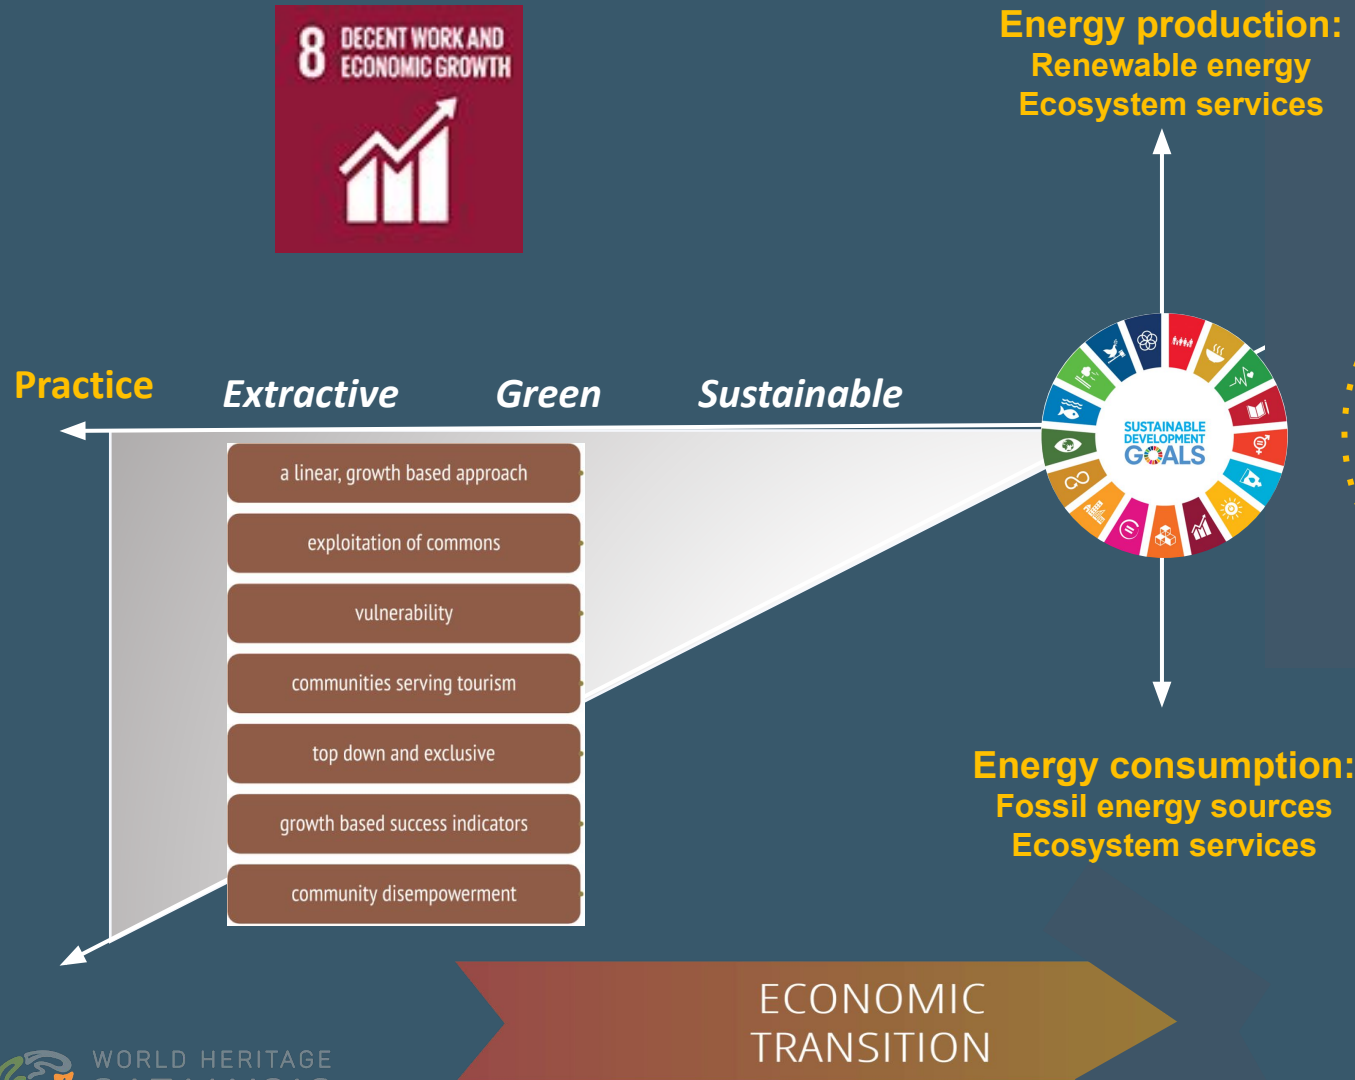

# Resilience & capacities

**Resilience** - the capacity of a system to deal with change and continue to develop sustainably while maintaining its identity.

**Adaptive capacity** - skills and mechanisms used to adapt to challenges, and implement incremental changes that enable the system to maintain functional.

**Transformative capacity** - the capability to undergo significant and fundamental changes in response to challenges or disruptions.

# Beyond “sustainable tourism”

The future of tourism?  
The future of host communities?  
Tourism as a transformational pathway?

# “Energy positive hosting”

Tourism establishments (hotels, resorts, and lodges) and operators (transport, attractions) generating more energy than they consume, leading to a surplus of clean and renewable energy.

Could be achieved by implementing energy-efficient technologies, utilizing renewable energy sources like solar panels or wind turbines, and incorporating energy storage systems, tourism businesses.

Use of clean energy in the tourism sector could reduce carbon footprint and contribute towards environmental sustainability.

**“Energy positive hosting”**

# ICOMOS calling for transformative change

## ICOMOS International Charter for Cultural Heritage Tourism (AGA 2022/14)

*There is a need and opportunity to **recalibrate the perpetual economic growth-based approach to tourism**, recognizing and mitigating its unsustainable aspects".*

*Climate change is calling for a **transformational and regenerative approach** to cultural tourism where the priorities focus on building resilient and adaptive communities and heritage places.*

*The Charter aims to align the work of cultural heritage and tourism stakeholders in the **pursuit of positive transformative change**, offering principles for regenerative tourism destination management that is conscious of heritage values, as well as their vulnerability and potential.*

7 principles.

**ICOMOS**  
international cultural tourism committee

## ICOMOS Resolution on the Cultural Dimensions of the SDGs (21GA 2023/16)

*Noting that ....economic growth is a key indicator of development which has the potential to exacerbate the exploitation (privatization, commercialization and monetization) of nature and culture globally;*

*Conscious of the need for heritage and development actors to identify the significance and **transformative potential of culture** in sustainable development beyond the designated SDG Target 11.4.....;*

*Acknowledging the need to go beyond the **current discourse of 'sustainability'** and apply a systems approach **supporting generative and restorative economic activities** that strengthen integrated social, cultural and environmental systems that can be sustained and enhanced;*

# New orientations

## LINEAR ECONOMY

ENERGY FROM FINITE SOURCES

## CIRCULAR ECONOMY

ENERGY FROM RENEWABLE SOURCES

# Strategic & transformative management

*An emerging community of practice applying **strategic and transformative approaches** in tourism destination and visitor management aiming to protect natural and cultural heritage while building adaptive, resilient, and peaceful communities.*

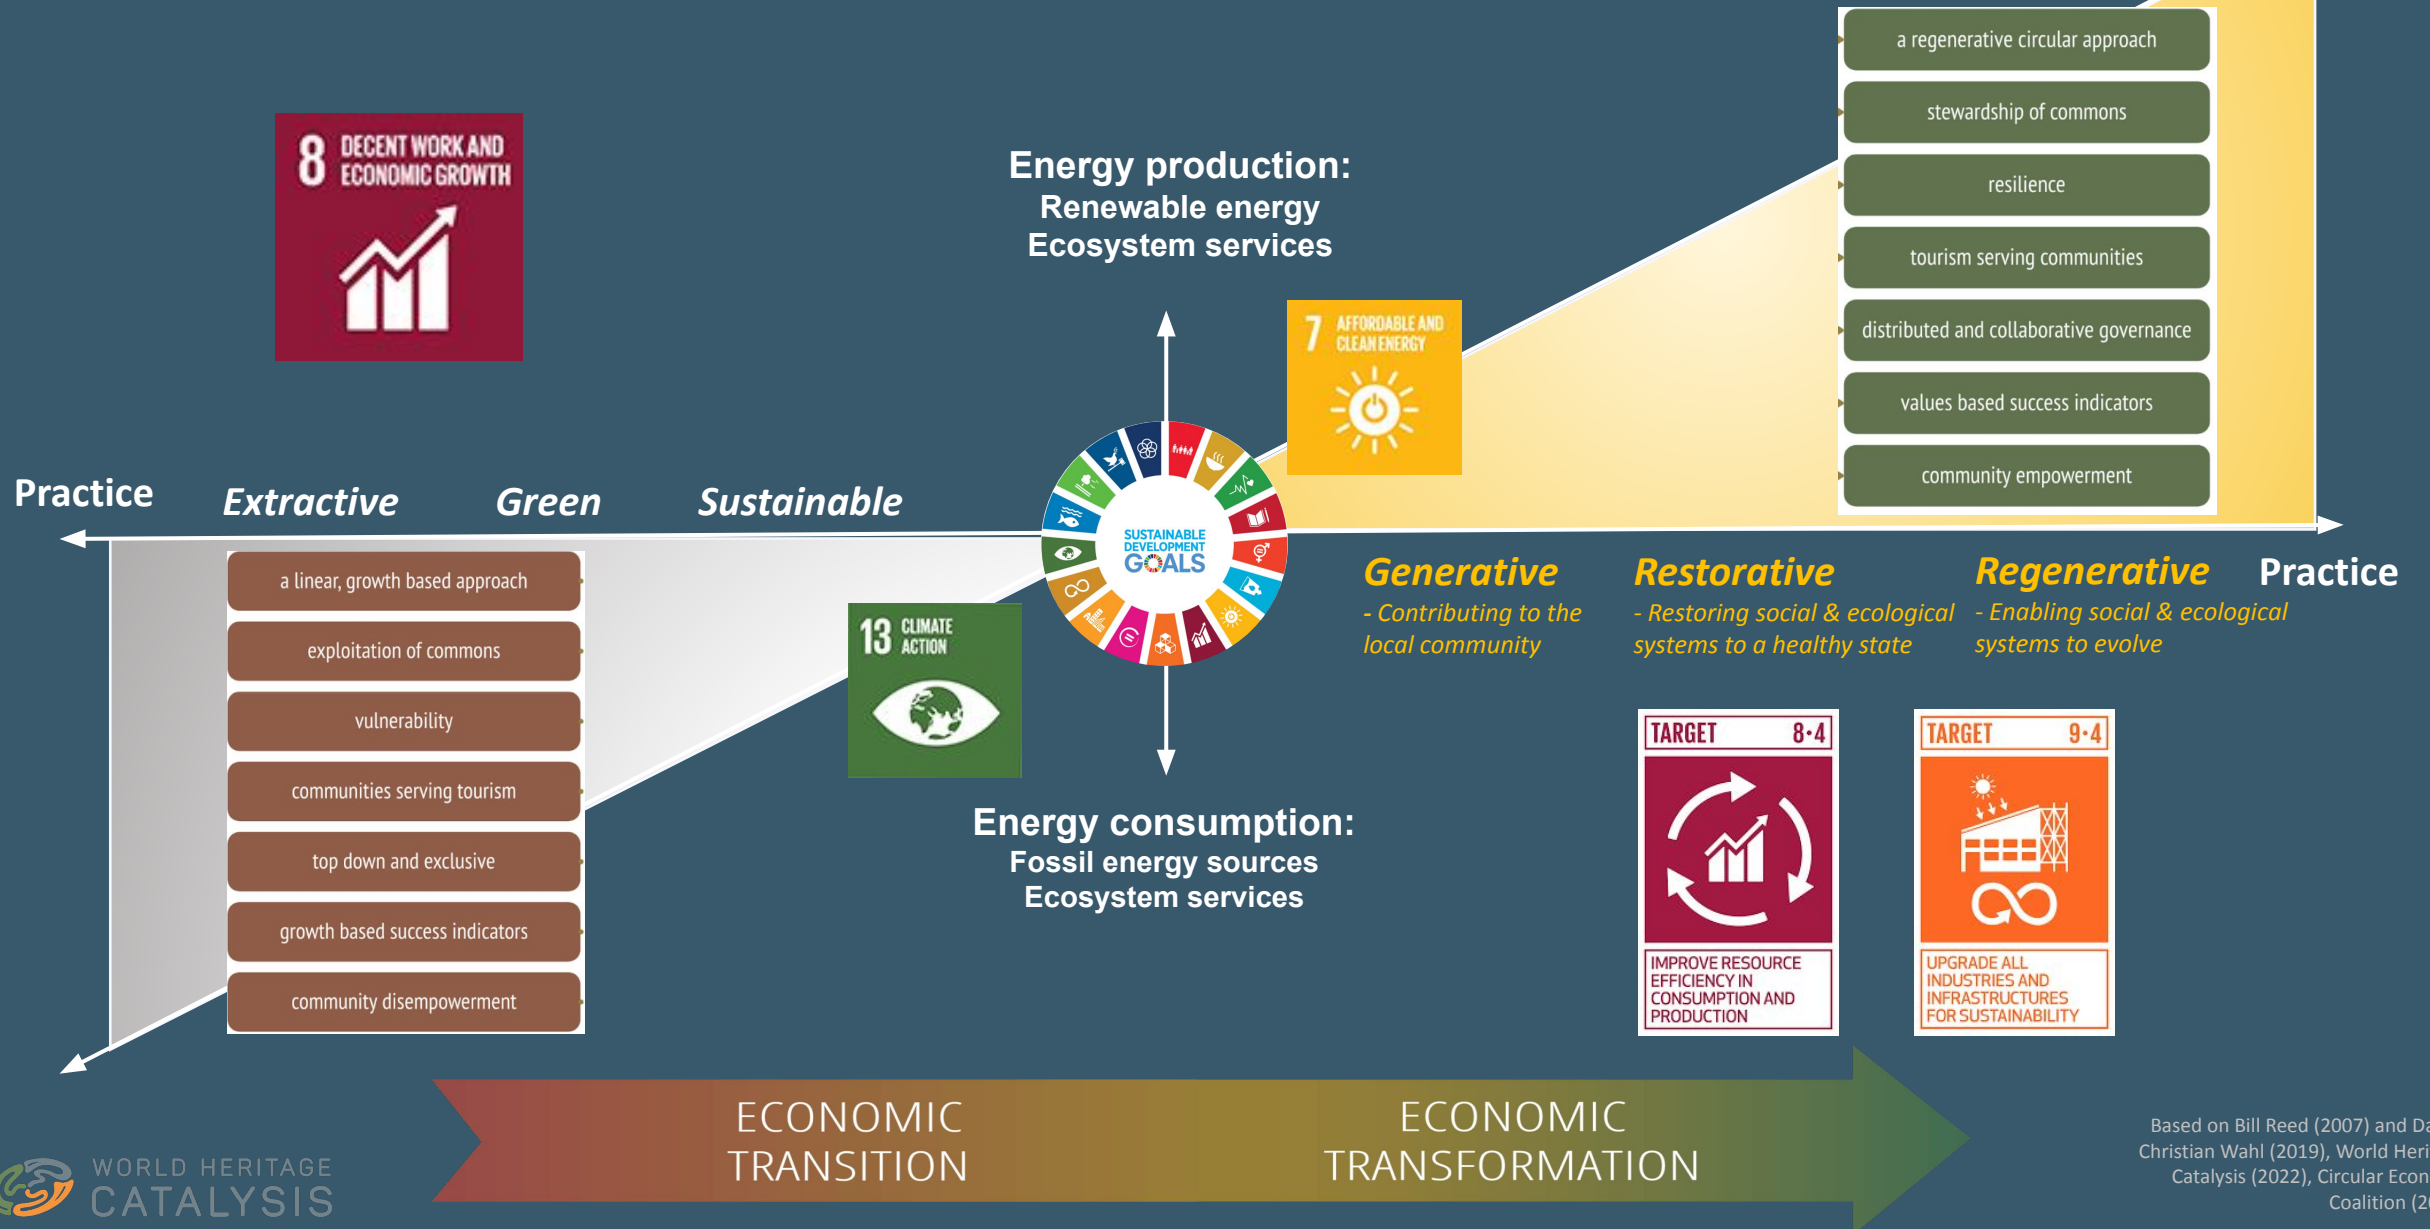

## **Strategic management**

aligning resources and capabilities with identified goals and strategies.

## **Transformative/transformational management**

challenges the current state and intent to bring about more profound and fundamental change. It involves unlearning, scientific creativity, and experimental practice.

# The transformative practice journey

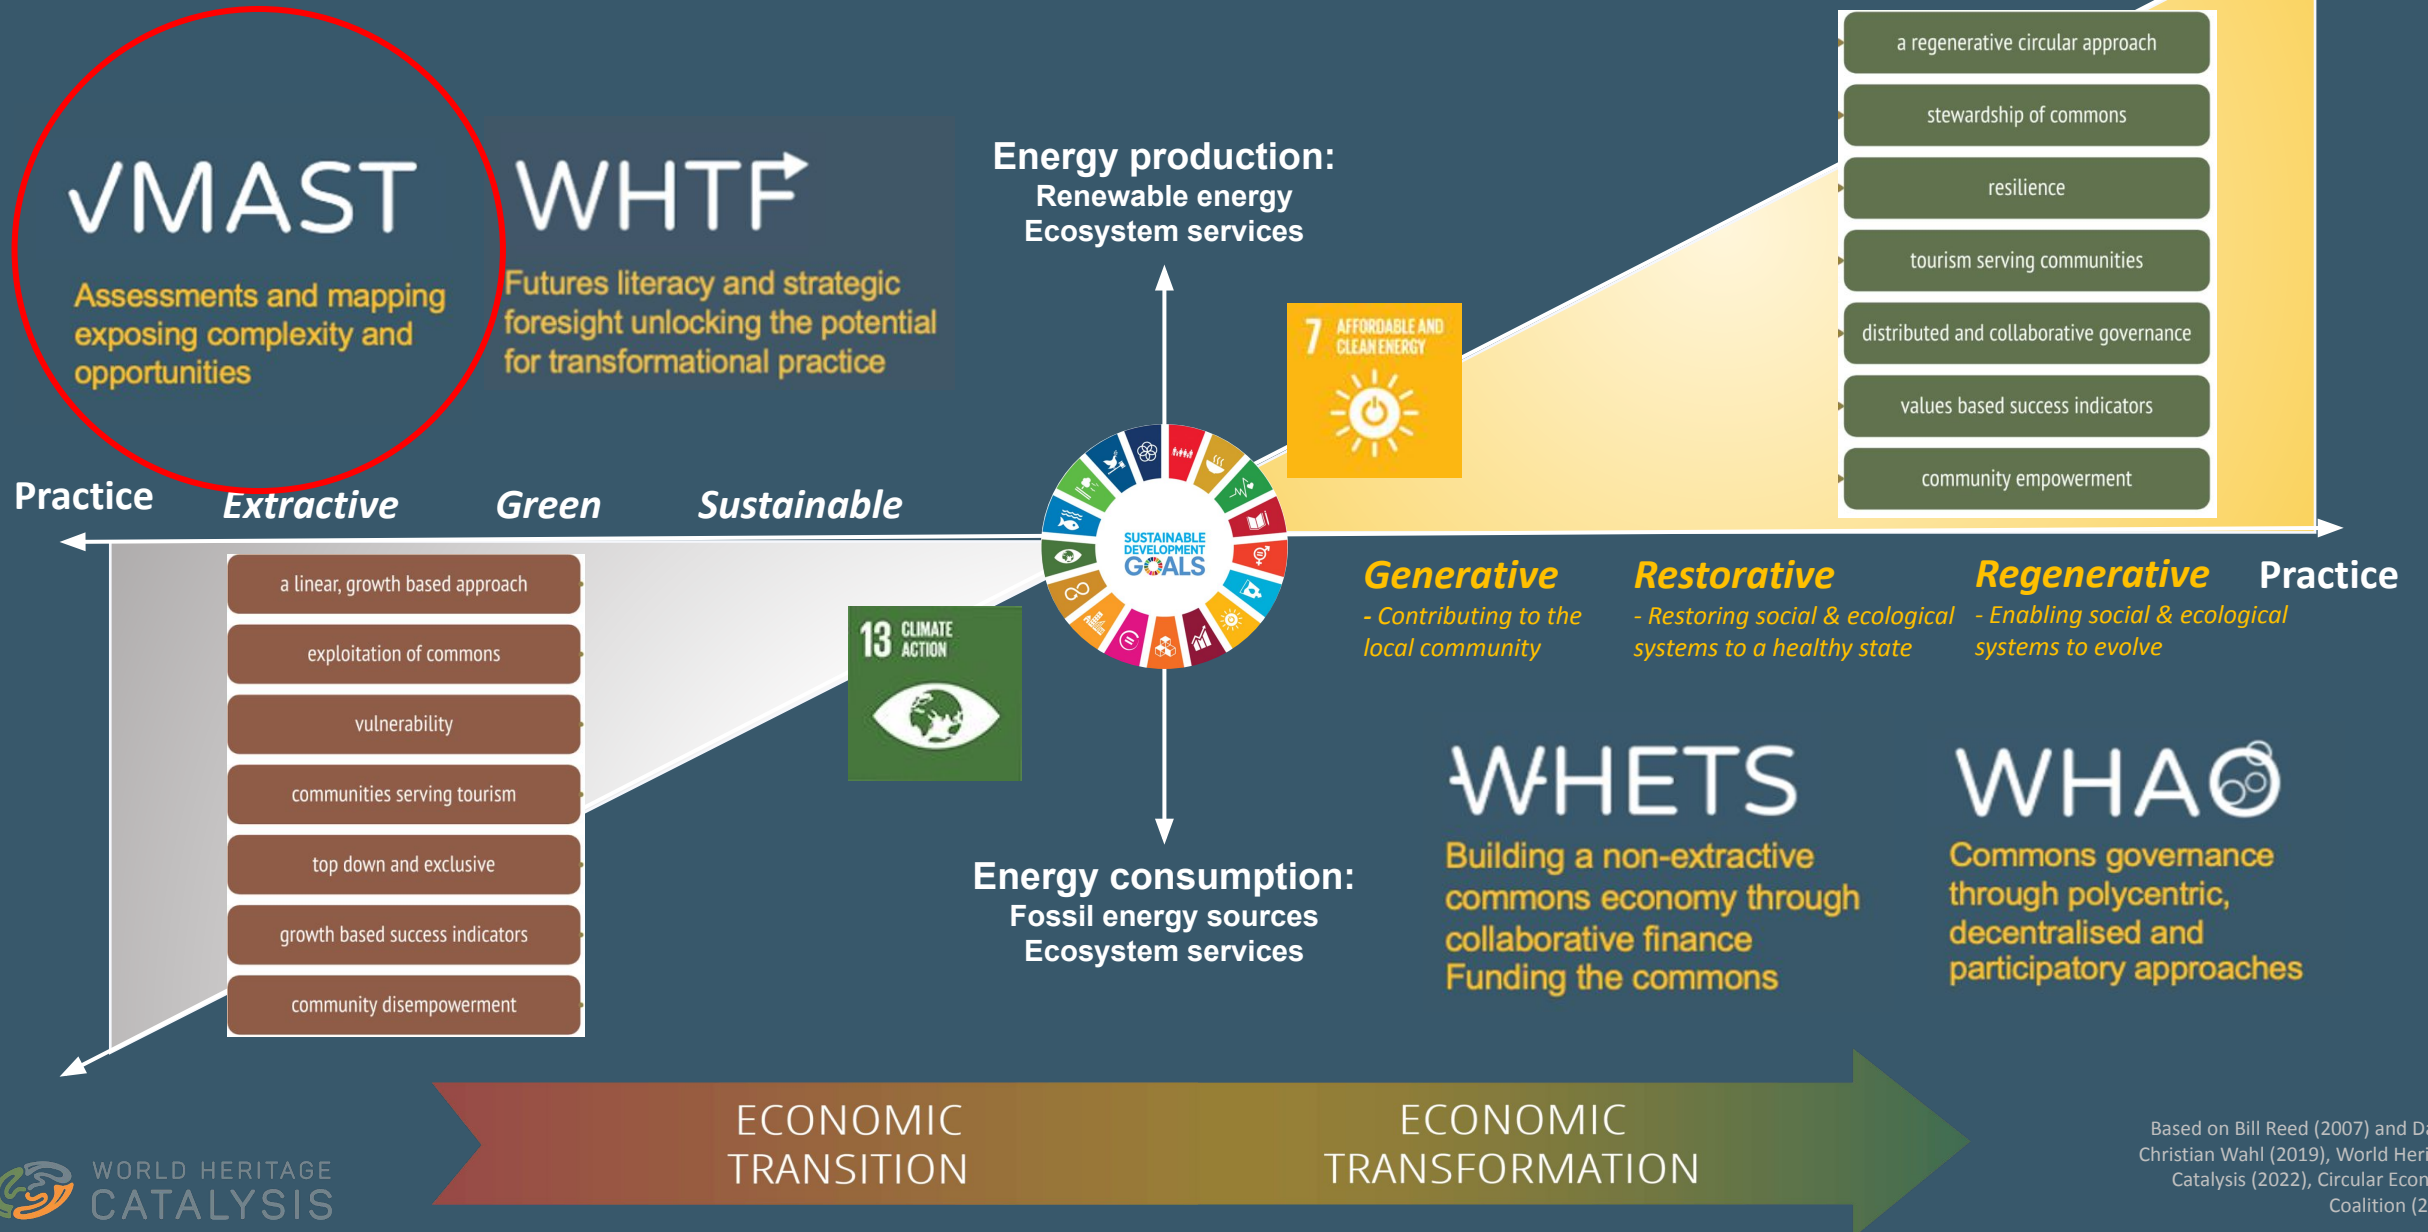

# Tourism as a transformational pathway

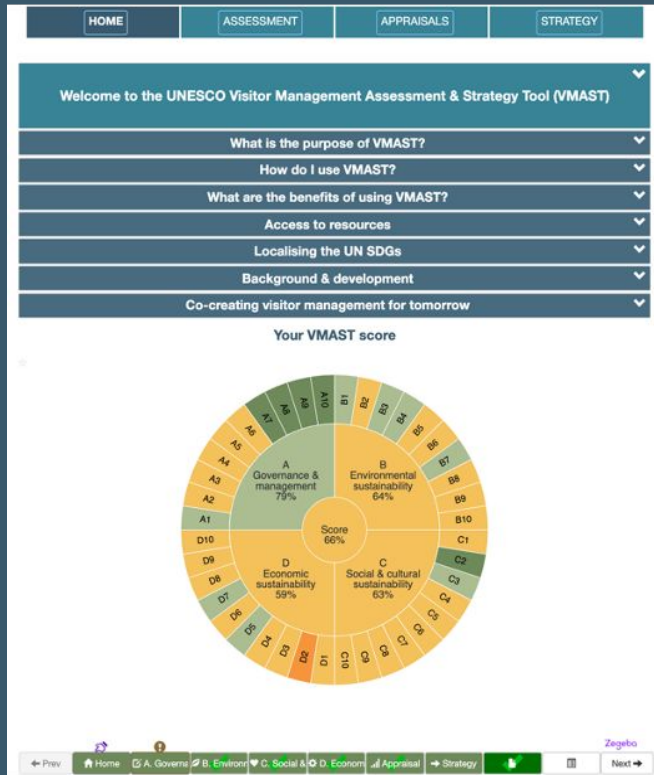

*Tourism as a transformational pathway needs to decouple the host-visitor relationship from the exploitative and extractive economy and instead support non-exploitative reciprocal exchanges. In the future, 'energy positive' tourism can be **generative** by creating new products and services that contribute to the wellbeing and sustainability of the local community, or **restorative** by helping to maintain and strengthen social- and ecological systems. Tourism products and services in a circular economy involving both **resource and financial circularity**, could contribute to a regenerative development paradigm.*

# The transformative practice journey

- UNESCOs Visitor Management Assessment & Strategy Tool

A tool helping WH site management authorities improve visitor management for heritage protection and localisation of the UNSDGs

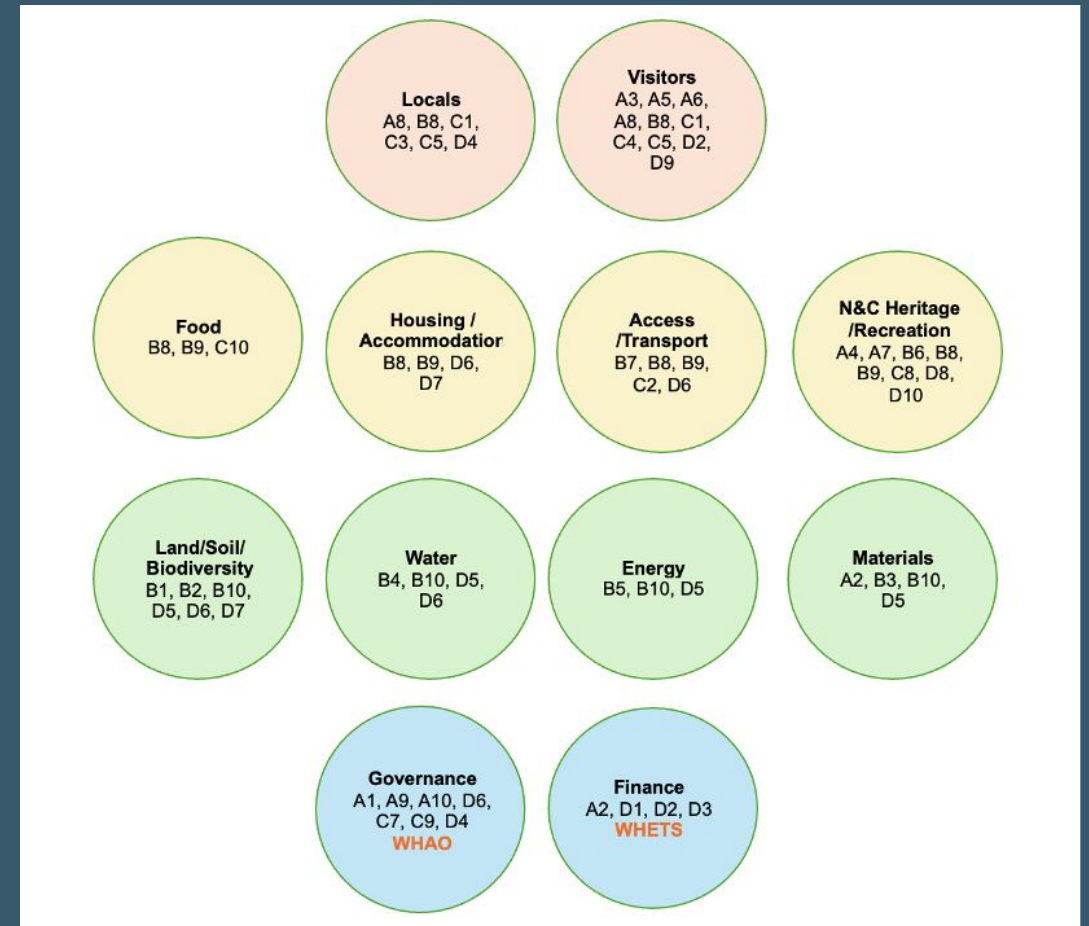

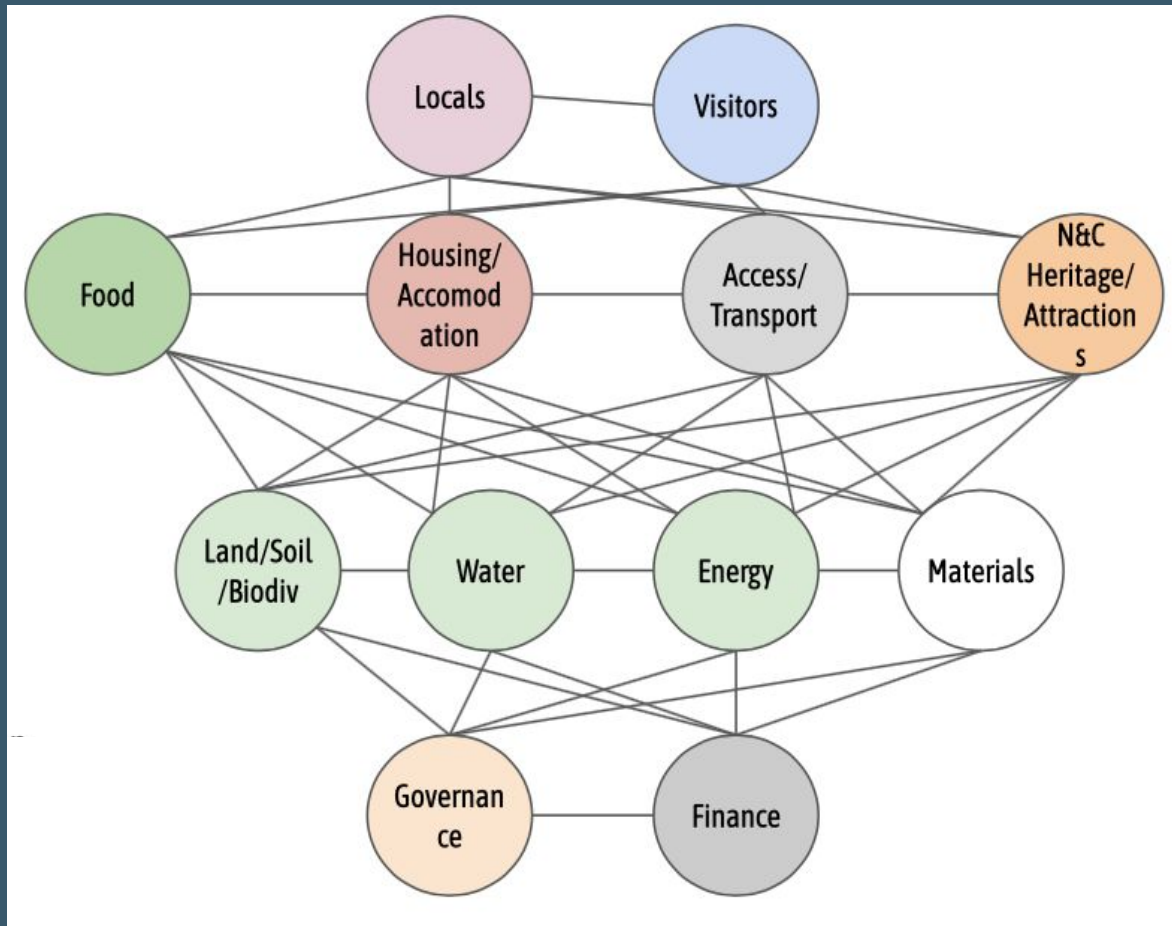

<p><b>Goal A</b></p> <p>Effective governance &amp; visitor management protecting heritage values</p>	<p><b>Goal B</b></p> <p>Contribution to environmental sustainability, climate change mitigation &amp; adaptation</p>	<p><b>Goal C</b></p> <p>Contribution to inclusive social development &amp; cultural sustainability</p>	<p><b>Goal D</b></p> <p>Contribution to inclusive &amp; sustainable economic development</p>

- Communication
- > Improved outreach
- Capacity development
- > Strengthened capacities
- Collaboration
- > Increased impact

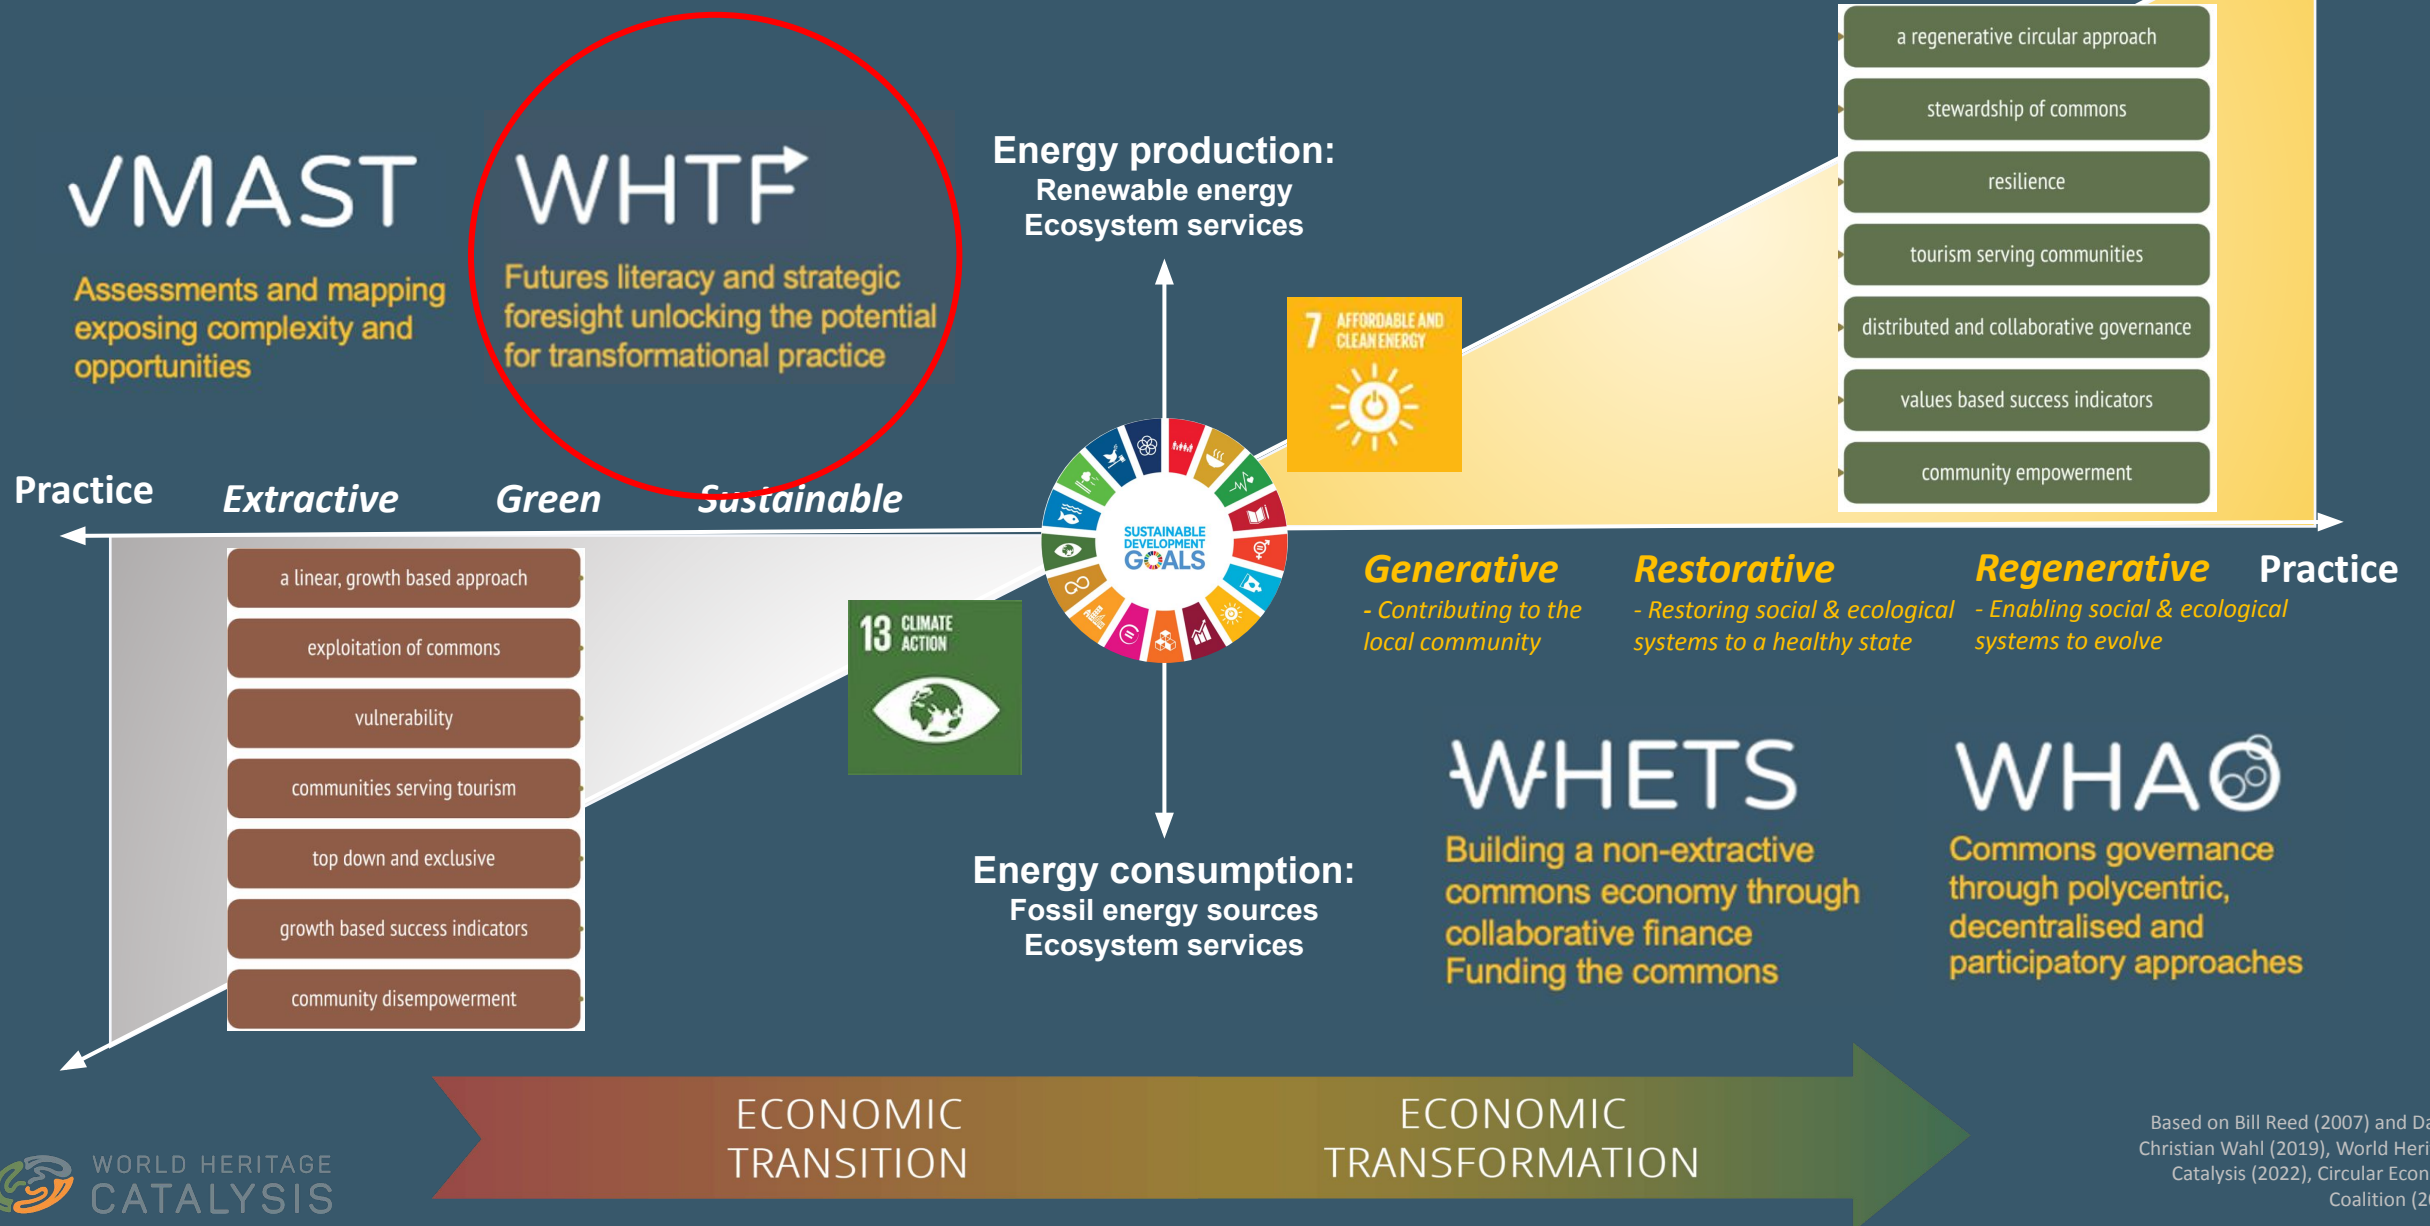

# VMAST addressing the “local system”

# The transformative practice journey

© Unknown

# “The future”

## Blindspots

Areas in which a person or organisation **lacks understanding or insight**, potentially leading to flawed decision making.

### Examples:

Tourism professionals < heritage protection

Heritage professionals < economics

Neoclassical economist < heterodox finance innovation

Co-fi innovators < tourism and heritage protection

## Futures illiteracy

Inability to critically review one's own **assumptions and biases** about the future.

It prevents individuals and institutions from imagining, anticipating and developing agency in a VUCA world

“ The illiterate of the 21<sup>st</sup> century will not be those that can't read or write, but those who cannot learn, unlearn, and relearn. ”

Alvin Tofler: Rethinking the Future

# Futures methods & skills

## RESILIENCE THINKING

enhancing resilience by integrating **disaster risk management and climate change responses** in planning and management

Focus on resilience as a competitive advantage

For more information:

**ICOMOS Wayfinder**

<https://openarchive.icomos.org/id/eprint/3074/>

## STRATEGIC FORESIGHT

a systematic and structured approach to thinking about the future, **anticipate future scenarios** and plan accordingly

Challenges existing thinking patterns by generating new directions for advancing societal goals

For more information:

**ICCROM Foresight**

<https://www.iccrom.org/what-we-do/research/foresight>

**Anticipating Futures for Heritage**

<https://www.iccrom.org/publication/anticipating-futures-heritage>

## FUTURES LITERACY

the capability to imagine and use alternative futures in various contexts and **identify assumptions** involved in this process.

Enhances imagination, preparedness, recovery, and innovation in the face of change

For more information:

**UNESCO Futures Literacy**

<https://www.unesco.org/en/futures-literacy>

# WHTF

## - World Heritage Tourism Futures Lab

An approach helping site management authorities, local community and tourism stakeholders create a shared vision and stress-test strategies against different futures

Example:

1: Driver mapping > The future of tourism & community

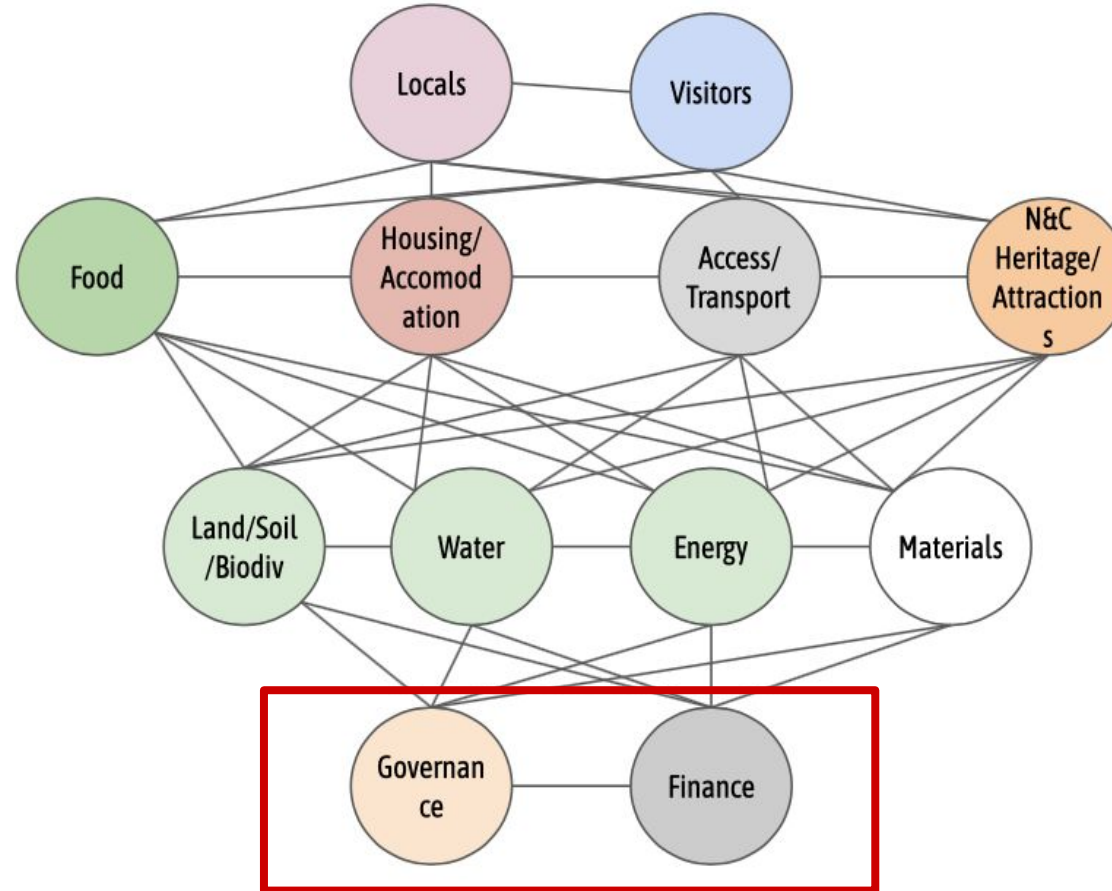

2: Visioning futures

3: Identifying strategic objectives to outline a development path

4: Stress-testing strategies towards archetypical scenario and changes in the operational environment

# Systems change through governance & finance

**Relationship  
between systems  
within a (host)  
community**

Stake/interest  
holders/consumers/producers

Interface between tourism &  
community

Underlying conditions for  
sustainability

New value networks  
Decoupling the economy from  
extraction

# The transformative practice journey

**VMAST**

Assessments and mapping exposing complexity and opportunities

**WHTF**

Futures literacy and strategic foresight unlocking the potential for transformational practice

Energy production:  
Renewable energy  
Ecosystem services

Energy consumption:  
Fossil energy sources  
Ecosystem services

- a regenerative circular approach
- stewardship of commons
- resilience
- tourism serving communities
- distributed and collaborative governance
- values based success indicators
- community empowerment

Practice ← **Extractive** **Green** **Sustainable**

- a linear, growth based approach
- exploitation of commons
- vulnerability
- communities serving tourism
- top down and exclusive
- growth based success indicators
- community disempowerment

**Generative** - Contributing to the local community  
**Restorative** - Restoring social & ecological systems to a healthy state  
**Regenerative** - Enabling social & ecological systems to evolve  
 Practice →

**WHETS**  
 Building a non-extractive commons economy through collaborative finance  
 Funding the commons

**WHAO**  
 Commons governance through polycentric, decentralised and participatory approaches

# Towards circular economies

## Towards circular and regenerative economies

*The term 'circular economy' is typically understood to refer to material flows, with less attention given to finance. However, without a flow of payments in the opposite direction to materials, a circular economy cannot become self-sustaining, making investment less attractive - despite demands for progress from both government and investors.*

*Credit Commons Society 2022*

C I R C U L A R  
REGIONS

CIRCULAR ECONOMY  
COALITION

# “Financial innovation camps”

## DeFi

### Decentralised finance

decentralized, blockchain-based financial services and applications that operate without centralized intermediaries

Eg. Speculative cryptocurrencies

## ReFi

### Regenerative finance

incenting sustainable practices and rejuvenation of natural resources through use of decentralized finance (DeFi) tech.

Eg. Channeling fiat to conservation

## CoFi

### Collaborative finance

Reciprocity, cooperation, shared decision-making, and collective resource management

Eg. “People powered” economics

### Fiat based innovation

Use of tech to remove the need for trust within a community

### Mutual credit based innovation

Use of tech to build trust within a community

# Commons supportive economics & governance

## WHETS

Building non-extractive commons economy through collaborative finance and funding the commons

- ★ Credit clearing
- ★ Vouchers
- ★ Time banks
- ★ Bartering
- ★ Local currencies
- ★ Saving pools
- ★ Local Exchange Trading Systems (LETS)

### WHETS values

- a people centred and rights based approach

#### Asset & inclusivity

We are all assets, with something to give or share. There shall be room and opportunities for everyone to support the ideals set out through the World Heritage Convention and in efforts building community.

#### Redefining work

Efforts that build community, raise healthy children, revitalize neighborhoods, sustain traditions, makes democracy work, advances social justice and makes the planet sustainable is valuable work. It needs to be honored and rewarded.

#### Reciprocity

Capacity is built through collaboration and reciprocity. Instead of "How can I help you?" ask "How can we help each other build the world we all will live in?"

#### Social networks

Joined in shared purpose we are stronger than individuals. Helping each other, we reweave communities of support, strength & trust.

#### Respect

Every human being matters. Respect underlies freedom of speech, freedom of religion, and everything we value. Respect supplies the heart and soul of democracy. We must respect where people are in the moment, not where we hope they will be at some future point.

Adapted from <https://timebanks.org/more-about-timebanking>

## WHAO

Commons governance through polycentric, participatory and decentralised approaches

- ★ Coops
- ★ Rotating Labour Organisations (ROLAS)
- ★ Land Care Trusts
- ★ Decentralised Autonomous Organisations (DAOs)

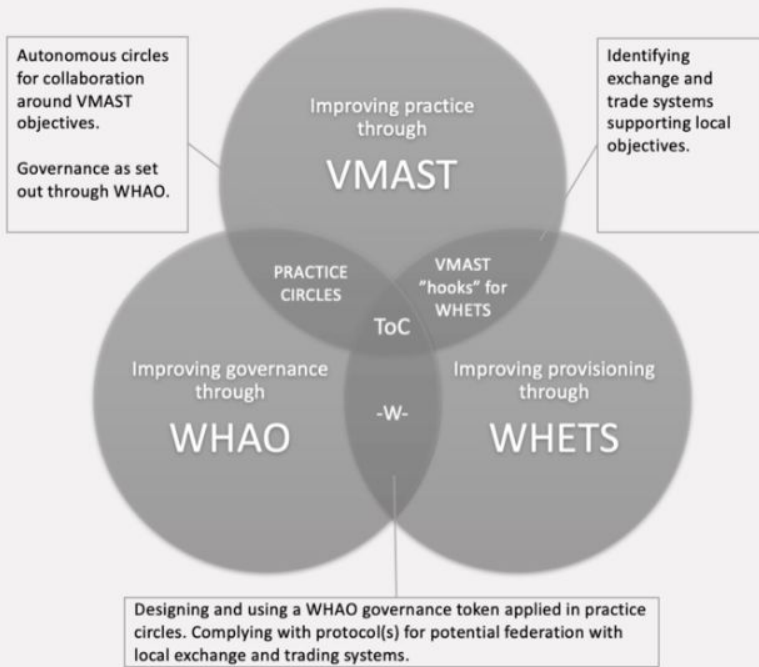

# Relevance

**WHETS promotes economic operating infrastructure and financial tools addressing**

<b>Provisioning</b>	<b>Leakages</b>	<b>Resilience</b>	<b>Recovery</b>
<b>Financial infrastructure for economic inclusion and provisioning.</b>	<b>Financial circularity prevents unnecessary leakages.</b>	<b>Supporting a variety of sectors, moving beyond dependence on tourism revenues.</b>	<b>Interest free investment supplementing conventional funding. 'Building back better'</b>
Even successful tourism destinations may experience the toll of economic discrepancies. Without access to appropriate financial systems people may struggle to provide for self and family.	Due to outside ownership of tourism related chains, franchises and imports, economic leakage from tourism is often very high. Money coming into a community typically only changes hands a few times before it goes out of local circulation.	Most tourism destinations risk future disruptions that could deprive communities of revenues. Tourism dependent communities are specifically vulnerable.	A major disaster and/or smaller disruptions could prevent regular economic activities for longer or shorter periods. In some cases recovery would require significant investments but often funding is scarce or early investments extractive.

# Theory of Change

## RELATIONSHIP BETWEEN VMAST, WHAO, WHETS & EMERGING THEORY OF CHANGE

### VMAST – UNESCOs Visitor Management Assessment & Strategy Tool

4 goals; 40 Objectives; 200+ management indicators

### WHAO – the World Heritage Autonomous Organisation

A governance infrastructure supporting participatory and polycentric governance

### WHETS – World Heritage Exchange Trading Systems

A portfolio and ecosystem moneyless exchange & trading systems

9. February 2023

## Emerging Theory of Change

Problem we are solving	Stakeholder	Entry point	Catalytic action	Measurable effect / Patterns	Wider benefits	Long-term changes
MICRO: individual dis-empowerment  MESO: community vulnerability  META: global unsustainability	WH site managers / site management	UNESCO VMAST	WH site management make use of VMAST	Improvements across VMAST objectives and target indicators	WH sites are better protected with management supporting community objectives	WH sites are catalysts in the transition towards regenerative economies.
	Professionals & practitioners with knowledge and skills	World Heritage Catalysis (WHAO)	Professionals and practitioners connect and build capacity through VMAST circles	Number of professionals and practitioners taking part in VMAST circles	Capacity enhancement on regenerative practices across geography and domains Peer governance	Communities are less dependent on tourism and thereby less vulnerable to disruptions / more sustainable
	People living in & around WH Business owners operating in & around WH Visitors & tourists to WH	WHETS	Civil society members exchange and trade through CoFi	Number of people, businesses and organizations trade and exchange using CoFi	More people (potentially billions) engage in an inclusive/circular/ restorative/ regenerative economy	Individuals are empowered through skills exchange and the ability to trade and exchange (provide) through CoFi

# Emerging community of practice

# THANK YOU!
